Energy Sector

Asia is the biggest Source as well as the Consumer for Power, Oil and Gas. Considering the fact that Asian Countries like India, Bangladesh, Nepal, Bhutan are Developing Countries and they are moving very fast in Infrastructure development, there are lot of opportunities in the Asia in Power, Oil and Gas Sectors as the Demand is increasing many folds considering the rapid growth strategy of respective countries.

India is biggest opportunity for Global oil Producers and they are eyeing on India to enter into growing Indian renergy sector. If we go by the data, India is the third biggest importer of oil. India is looking to increase its rening capacity many fold.

India is looked as the Investment opportunity by key stakeholders of Oils & Gas from Kuwait, Saudi Arabia and similar other countries. Recently, huge Investments also made in this

sector from these Gulf countries. For energy sector future in India seems to be very positive and bright as GDP growth of India is very high and it is moving higher in world economic growth.

We work to offer a complete and global solution for each of its customers. The wide network of subsidiary companies in India and guarantees service adapted to each market requirements. Our main aim is to meet customer needs and to be ahead in future.

Let's Grow Together

Agriculture

The agriculture sector is a prominent part of the Indian economy. It supports about 50 per cent of India's workforce, and occupies more than one third of the country's total geographical area.

The sector continues to be the single largest contributor to the Indian economy. Agriculture is an essential link in the supply chain of the manufacturing sector, and plays an important role in the rural development of the country.

Agriculture can bring holistic development around the globe but it throws unique challenges while awaiting creative and committed solutions. We are a common platform for convergence of expertise and provide specialized products to implement any project at grass root level.

Our state-of-the-art manufacturing process is backed with technologically advanced tools and machineries that have facilitated us to manufacture a wide range of products. The entire

manufacturing unit is controlled by our effective management team sharpened through years of experience.

Moreover, we have Quality Assurance Unit and R&D Unit that assures our quality policy and innovation. Our main aim is to provide quality equipment's that are both user friendly and cost effective.

Our extensive agricultural range includes drip irrigation, rice milling, agronomic products, agricultural machinery and landscaping equipment.

Solar Energy

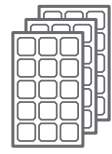

When you begin to generate your own solar power, your electricity bill can drop significantly. When your solar power systems generates more electricity, than your premises can immediately use. Your excess power flows back to utility grid and your meter literally spins backward. How much you can save will depend on size/ rating of your solar power system.

We will provide quality equipment's from India that's right for your premises. We will continue to do all it takes to make solar energy affordable and accessible to people in need across the world.

We source best-in-class equipment from all around the world to deliver the finest product quality. Our highly competent research and development team constantly works on improving our product portfolio and introducing new products to serve our customers better and we are eager to contribute more to the Indian and the global solar revolution

Our main aim is to provide quality solar equipment's that are both user friendly and cost effective.

Steel Accessories & Products

The strength of the Stainless Steel Division is in manufacturing products for critical applications by meeting the stringent requirements which are then tested in the in-house Laboratory accredited to ISO 17025. The products are supplied in niche market such as Oil & Gas, Refinery & Petrochemical, Dairy, Chemical & Fertilizer, Thermal, Solar & Nuclear Power, LNG, Desalination, Defence, Aerospace, Chillers & Cooling system, Pulp & Paper Industry, Automobile etc. This makes the company an ideal choice for major EPC Contractors, project owners & process licensors across the globe.

Quality of Steel is one of the world's most essential materials. It is fundamental to every aspect of our lives, from infrastructure and transport to the tinplated steel can that preserves food. It is one of the most important products of the modern world and is of strategic importance to any industrial nation. From construction, industrial machinery and transportation to consumer products, steel finds a wide variety of applications. It is also an industry with diverse technologies based on the nature and extent of use of raw materials.

We source best-in-class steel accessories to deliver the finest product quality. Our highly competent research and development team constantly works on improving our product portfolio and introducing new products to serve our customers better. And we are eager to contribute more to the our African Clients.

Transportation

It has been aptly remarked by Dr. Marshall, ***"Most effective economic fact of our times is not the development of manufacturing industries but that of the transport services."***

It is clear that the property of a country does not depend on the development of agriculture industry and mines alone but also on the development of means of transport. Transport system of a country refers to the different means which carry men and material from one place to the other.

Transportation has assumed much importance in developing economy like ours for rapid economic growth. If agriculture and industries are supposed to be the body of the country, transportation may be said to be the nerves and veins of the economy. These days transportation is known as the symbol of civilization

A well-knit and coordinated system of transport plays an important role in the sustained growth of a country.

Transport has recorded an extensive growth over the years both in spread of network and in output of the system.

We offer electric battery rickshaw which is immensely appraised in the market for ***robust construction, high performance, longer service life, Comfortable seats and Low Maintenance***. These products are manufactured by using cutting edge technology and high grade components as per set ***Quality Standards***

We are established since 2016 making world a better place and looking for more alternatives to ***replace Petrol and Diesel***. ***Our aim is to Make Earth Greener.***

Building & Construction Equipments

The activities involved in Construction Projects where the magnitude of the work is on a large scale, Speedy Work and Timely Completion of Work with Quality Control are very vital. In order to achieve this, Mechanization of Work has to be done, where Construction Machinery & Equipment play a pivotal role.

Proper use of appropriate equipment contributes to Economy, Quality, Safety, Speed and Timely completion of the Project. Construction equipment is an important part of any construction process. It is not always desirable or possible for the Contractor to own each and every type of Construction Equipment required for the Project. Considering the various aspects of the utility of particular Equipment, the Contractor has to economically justify whether to purchase the Equipment or to hire it.

Our engineering and manufacturing locations around the globe are constantly innovating to create the best solutions for today's applications. You will find our products on everything from trains, busses, cars, and agricultural and construction machinery to high-horsepower gensets, power electronics, windfarm, and aviation cooling systems.

In addition to custom solutions, we provide Mobile Cranes and Tower Cranes segment. In addition to Mobile Cranes, we also offers Mobile/Fixed Tower Cranes, Crawler Cranes, Truck Mounted Cranes, Lorry Loaders, Backhoe Loaders/Loaders, Vibratory Rollers, Forklifts, Tractors, Harvesters and other Agri Machinery.
